

Las Vegas

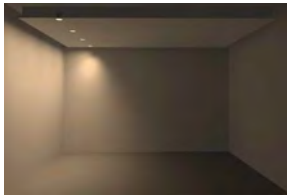

Las Vegas is a broad range of recessed downlights. Selected high-quality LEDs, $Ra \geq 95$, show the real colour of illuminated objects. The low glare ($UGR < 6$) design makes the light look invisible in the ceiling. Various optical accessories and beam angles give designers lots of convenience to realize their creative design concept and create a warm atmosphere. There are many choices in this range, fixed or adjustable or wall washer, with trim or trimless, different IP rating (some items are IP44, even IP65), different sizes of the cut-out (55mm, 75mm, 105mm, 125mm, 150mm), different wattages and lumen outputs, different colour temperatures, etc. Modular design provides flexibilities to customers, designers and installers. The LED module is designed in different sizes and wattages, 3 pairs of magnets built-in the module, and the main body that means the LED module can be easily fixed to the main body or removed from the body. This design is very convenient for customers to replace the LED module when the LED life is ended; furthermore, the LED module and inner part can be pulled out without removing the outer frame, this design avoids damaging the ceiling. Las Vegas downlights drivers can be ON/OFF, Triac-dimming, 0/1-10V dimming, or DALI dimming.

Fixed

Adjustable

Wall Washer

S2

CEJ61075-S
Fixed

Suitable for 10-40mm thick ceiling board

Las Vegas - Pro

- Discreet 75mm dia cutout
- 9w through to 15w making it suitable for ceiling heights from 2.7m to 5m - Fresnel lens that beam shapes the light and creates a soft transition in the ceiling
- UGR glare rating of < 6 meaning these lights are almost invisible
- Idustry leading premium LED with SDCM 2 and CRI95+ an important specification quality differentiation
- A diverse range of accessories including honeycomb filters and elliptical lenses
- 5 different colour reflector options
- Black or white body, square or round

Wattage: 9W
CCT : 3000K
Beam : 50°
Cutout : $\Phi 75\text{mm}$
IP Rating : 20
CRI : $Ra \geq 90$
SDCM ≤ 2 UGR ≤ 6
Finish : Matt white
Material : Die-casting Aluminum trim and heatsink, black nickel reflector.
