Smartscape are happy to announce the release of their new DALI rotary dimmer.

Replacing their popular AXA-DALI P20, the new DALI-RD20 is now available to suit any 30 series compatible switch plate.

The most simple way to control your DALI fittings the DALI-RD20 allows you to switch your lights on/off with a simple push and dim up/down with the rotation of the knob. Basic functionality is achieved straight out of the box, with more advanced features being easily setup by the installer.

Some features of the new unit include:

- DALI Broadcast control for up to 20 ballasts per controller
- Simple connection between the control unit and rotary pot via a supplied RJ12 cable.
- 2 way control by adding a slave unit simply connected with a supplied RJ12 lead.
- Add up to 4 momentary press switches to save and recall scenes
- Dry contact or voltage inputs for global control or integration to third party systems (security, fire etc)
- 240v sensor input for seamless control in rooms with sensors.
- Install multiple rotary pots on a single faceplate
- Fully tested and certified to Australian standards.

Our product pages are currently being updated and more details will be added shortly.
