

Bubble Soft Return Ceramic Wall Light

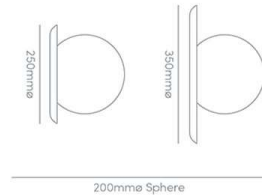

lumen⁸

The Bubble Soft Return wall light is an elegantly textural feature piece.

Part of our Handmade Ceramic Bubble series, this piece is designed by the talented Lumen8 team in partnership with our ceramic artist, Meg Neill. Each piece is crafted here in Queensland.

The ceramic's natural feel, combined with the bubble's crisp form and soft glow, creates the perfect balance for any space. This harmony is enhanced through our vast range of ceramic colours, shade finishes and metalware options, allowing for unique and personalised combinations.

The Soft Return wall light is captivating as a singular focal point. Similarly, it can be repeated throughout an interior to create a poetic story, or clustered together to compose an exquisite feature installation. This design

Specifications
