

## Entwine<sup>™</sup> Collection

As both sculpture and luminaire, Entwine is like an unravelling story, each twist and turn is part of the journey. The illuminating rope elegantly loops and knots around the horizontal brass rod. Utilising LED technology, the lighting collection is energy efficient and dimmable on SwitchDIM, DSI or DALI systems.

To make the Entwine<sup>™</sup> light easier to install, the rope comes preset in its draped configuration.

The Entwine™ collection can also be customised upon request. Contact Satelight to discuss these options.
